BRIEFLY ABOUT ME

Developer with over 10 years of experience.

- In my last years of university, I worked as a C# developer.
- After that, I worked as a "development department"in a small family company (PHP, JS, CSS).
- Then, for some time I was engaged in SEO (website promotion in search engines) and taught it, combining it with freelance website development.
- Currently, I work as an outsource developer in a wholesale company (PHP, JS, SCSS).
- Main technologies used: PHP, SCSS, JS (mainly jQuery), Docker, Yarn, Composer, Gulp, Git (GitHub), Webpack (implemented recently).
- Occasionally used: Python, rarely C#.
- Hired freelancers at various times.
- Now 1 programmer is subordinate.

SKILLS

PHP

JavaScript

MySQL

SASS

Git

Docker

NPM

Composer

YouTrack (Agile)

EXPERIENCE

2/2018 – present   **Full-stack outsource**   ООО "Интерьер комфорт"
Since 2018 I work for the company full time as the only developer. Since the beginning of 2021, I got 1 programmer as a subordinate.
What I do/did:

- Development of a new warehouses and wholesales system from scratch. Development of an internal CMS for this system. Architecture, frontend, backend, database.

- Transferring an online store to that CMS.

- Allocation of that CMS core in a separate project (framework).

- Development of a transportation management system (transport company) based on the developed framework.

```
PHP / JS / SCSS / MySQL / Linux / Docker / Yarn/NPM / Composer / GitHub
Gulp / Webpack
```

3/2016 – 2/2018
part-time

Full-stack outsource

ООО "Интерьер комфорт"

- Servers maintenance.

- Development of new functionality and support of 2 online stores.

- Support and maintenance of "warehouse and wholesale management system which I developed earlier as a freelancer.

- Adding new features to that system

```
PHP / JS / SCSS / MySQL / Linux  / Yarn/NPM / Composer / GitHub / Gulp
```

3/2015 – 4/2017
part-time

SEO teacher

ООО "ТопЭксперт" (www.topexpert.pro)

Taught basic knowledge of Search Engine Optimization (SEO) on the educational platform called TopExpert. Conducted a total of 7 study groups (more than 100 people).
The lecture's main emphasis was what a search engine is and how it works, what mistakes (in terms of SEO) site developers make and how to fix them. Wrote a guide about compiling the semantic core of the site.
Duties included:

- conducting theoretical and practice lessons

- checking homework assignments

- development of the training plan and the course itself

- creating additional materials (presentations, examples, etc.)

4/2013 – 2/2018
part-time

SEO specialist/Full-stack PHP dev

Freelance

Since the end of 2013, I, little by little, began to provide SEO services. Since 2015, SEO orders have been the majority of orders. The focus was on features that can be implemented from the developer's side. Those that almost no one thinks about at the development stage.
I continued to develop websites, but in smaller numbers (up to 10 websites per year). I mainly made websites using AmiroCMS and, sometimes, 1C Bitrix, WordPress, OpenCart.
```
PHP / JS / CSS / MySQL / Linux
```

2009 – 2015

Full-stack PHP dev

www.evrosite.ru

I was working for a small family company as a single developer. From time to time, freelancers were involved in the work, to whom I distributed tasks and checked the quality of execution.
I was in charge of the entire cycle of website development, from layout to placement on a hosting/server (including server support). Development was done, mostly, on the internal CMS developed by the previous programmer. Also, other CMS was used, such as OpenCart, 1C Bitrix, AmiroCMS, WordPress. In difficult times, I also performed the work of a salesman, project manager, and other duties.
```
PHP / JS / CSS / MySQL / Linux
```

2007 – 2008
part-time

Junior C# Developer

ООО 'Группа Алланд'

We developed information systems with specific tasks. Such as monitoring the full cycle of holding all-Russian intellectual competitions for schoolchildren.
My duties were:

- development of UI

- testing UI

- writing some simple controllers and data layers

- system architecture and database architecture (to a much lesser extent)

```
C# / SQL / Web/WinServices / OLAP / TFS
```

EDUCATION

2003 − 2008 Bachelor's degree full-time education	**Math. support and administration of information systems**	Ulyanovsk State University

I received a diploma of higher education in the specialty 'Mathematical support and administration of information systems' at Ulyanovsk State University.

Diploma topic: Development of an automated user support system based on an embedded Internet pager (.NET).

Technologies: C#, MSSQL, Client-Server

constant   **self-education**

I try to learn new technologies and improve my knowledge of existing ones. I occasionally try machine learning. I went through tutorials on ReactJS and Go. I listened to lectures on functional programming and Haskel in particular. Unfortunately, it is difficult to study something that is not applicable at the moment, since there is nowhere to apply it.

LANGUAGES

Russian - native
English - speak/write

HOBBY

I often watch something educational. I study different things, mostly related to computers. For example, Pen-testing or 3d modeling. Less often - I read sci-fi and fantasy.

NON PROFIT

Occasionally I write something in the blog and answer on StackOverflow. Sometimes I review posts on StackOverflow.
